**DETAILED ACTION**

***Election/Restrictions***

1. Applicant's election without traverse of Group I, claims 1-13 and 19-20 in the reply filed on 7/16/07 is acknowledged.

***Claim Rejections - 35 USC § 103***

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-13 and 19-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Salzsieder et al. US 6,315,551.

Regarding claims 1 and 19, Salzsieder '551 discloses burners having particular gas feed ducts comprising four substantially cocentric ducts including an exterior and interior injection duct.

Salzsieder fails to disclose a humidifying agent.

It would have been obvious to one of ordinary skill to include a humidifying agent in the injection device of Salzsieder because Salzsieder discloses mixing and dispersion of gas and fuel is achieved (see abstract and Figures).

Art Unit: 1754

Regarding claims 2-5 and 8-13, Salzsieder discloses four substantially cocentric ducts including a duct for axial air and a duct for rotary air disposed outside any fuel outlet opening (abstract, Figures).

Regarding claims 6-7 and 20, Salzsieder discloses a central stabilizer at the outlet (abstract).
